

Women's Pioneer Housing Association

Statement of Commitment to Health and Safety

Women's Pioneer Housing aims to achieve its business objectives through responsible and ethical management of the people and premises we manage.

So far as is reasonably practicable, we aim to ensure the health, safety and welfare of everyone who may be affected by our operations or sites; employees, contractors, customers, residents and members of the public.

It is our policy to maintain effective and appropriate arrangements to manage health and safety risks, as an integrated part of our business management. We will monitor and comply with all relevant legal requirements, approved Codes of Practice and industry best practice, review regularly our health and safety performance, and the effectiveness and appropriateness of our health and safety management system, to help achieve continuous improvement.

Suitable and sufficient risk assessments of all our operations and sites will be conducted by competent people. These will identify the necessary preventive and protective measures, which we will then implement and maintain. We will provide safe systems of work, and safe places of work, supported by effective and appropriate information, instruction, training and supervision.

Women's Pioneer Housing is committed to developing a positive health and safety culture based on the involvement of employees in health and safety forums, and mechanisms to involve employees in health and safety management.

We will take reasonable steps to assure ourselves that our contractors and suppliers are competent and will contribute to the health and safety of our work and workplaces.

Women's Pioneer Housing is committed to providing adequate resources to ensure our Health and Safety Policy is implemented, maintained and continually improved.

Our Health and Safety Policy will be reviewed every two years.
